

Weekly Update From Supt. Jerry Almendarez

April 25, 2022

SAUSD

The Future Begins Here

Dear SAUSD community,

I am happy to highlight that our COVID-19 positivity rates across SAUSD have continued to remain low even after the Spring Break. Our positivity rates across our zip codes are between 1.5% and 3.5%. See below for the full report. These rates are equal or lower than the county averages.

This indicates that our students, staff, and community members worked to follow the latest safety protocols during the break, and have continued to do so since.

I again want to remind everyone that we continue in this pandemic, and even though our positivity numbers are low currently, it's hard to predict whether another variant will cause another spike. That's why it's important to remind everyone to follow safety measures including frequent handwashing and sanitation of common spaces. Additionally, anyone who is sick or has any symptoms should stay home until they recover.

Stop Germs! Wash Your Hands.

When?

- After using the bathroom
- Before, during, and after preparing food
- Before eating food
- Before and after caring for someone at home who is sick with vomiting or diarrhea
- After changing diapers or cleaning up a child who has used the toilet
- After blowing your nose, coughing, or sneezing
- After touching an animal, animal feed, or animal waste
- After handling pet food or pet treats
- After touching garbage

How?

Wet your hands with clean, running water (warm or cold), turn off the tap, and apply soap.

Lather your hands by rubbing them together with the soap. Be sure to lather the backs of your hands, between your fingers, and under your nails.

Scrub your hands for at least 20 seconds. Need a timer? Hum the "Happy Birthday" song from beginning to end twice.

Rinse hands well under clean, running water.

Dry hands using a clean towel or air dry them.

Keeping hands clean is one of the most important things we can do to stop the spread of germs and stay healthy.
