SAUSD Student Technology Use Policy

Introduction

Technology resources provide important tools for students to use to further the District's educational mission. This policy outlines the expectations for you to use technology resources responsibly.

Educational Purpose

The District's technology resources and Internet system have been established as a means to support the instructional program of the school. This means that you will use the system for classroom learning activities, online assessments, college and career planning, and other school-related work.

Expectations

While using District and personal technology resources on or near school property, in school vehicles and buses, and at school-sponsored activities, each student must act in an appropriate manner consistent with school, district, and legal guidelines. It is the joint responsibility of school personnel and the parent or guardian of each student to educate the student about his/her responsibilities and to establish expectations when using technology. The District may place reasonable restrictions on the material you access or post through the system, and may revoke access to these resources if you violate the law or this policy. Violations of the law or this policy also may be addressed through the District's student conduct policy.

Technology Use

I agree to abide by the generally-accepted rules for technology use. These include, but are not limited to, the following:

1. I accept personal responsibility for my use of the Internet and the District network. I understand that all rules of conduct described in the Student Rights and Responsibilities book apply.
2. I will keep personal account numbers, home addresses and telephone numbers private and will not disclose personal identification information about myself or others when using electronic communication.
3. Illegal activities of any kind are strictly forbidden. Illegal activities are those acts that constitute a violation of Education Code, local, state, and/or federal laws. Federal copyright laws will be observed in the use and distribution of information retrieved from or sent over the Internet.
4. Unauthorized access to other user's work and/or resources is prohibited. This includes the use of another's password to gain unauthorized access. Access is to be limited to those resources needed to complete educational goals.
5. I will not use the network for personal and/or commercial financial gain. Product advertisement and/or political lobbying is prohibited.
6. I will not access, use, post, publish, display or transmit language and/or material that is harmful or inappropriate, threatening, obscene, disruptive, sexually explicit, or that could be construed as harassment or disparagement of others based on their actual or perceived ethnic group identification, color, race/ethnicity, national origin, gender, sexual orientation, age, disability, or religion.

Cyberbullying also includes breaking into another person's electronic account and assuming that person's identity in order to damage that person's reputation or friendships. I understand that any student who engages in cyberbullying on school premises, or off-campus in a manner that impacts a school activity or school attendance, shall be subject to discipline in accordance with District policies and regulations.

Students are not to reveal home addresses, telephone numbers, or any other personal information about themselves, other students, or District employees. Students may with parental and staff approval apply for scholarships or any other sanctioned activity that requires personal data. Parents/guardians have the right to request to see their student's computer files at any time.
