

Export part in Onshape

In Onshape:

1. Right-click on part "PartStudio" tab in bottom left corner
2. Click on "Export..."
3. In "**File name**" give the file a name (color, part, name)
4. In "**Format**", change "PARASOLID" to STL by clicking and going down to STL
5. Change "**Units**" to "Millimeters" by clicking and going down to Millimeter
6. Leave everything else alone and click "OK" when you are done
7. This will download the file to your "Downloads" folder.

In Gmail:

1. Log into your email
2. Write me an email by clicking "COMPOSE"
3. **To:** kevin.papke@sausedlearns.net
4. **Subject:** techdeck
5. Write a little note and include the color you'd like your project
6. "Attach" project by clicking on the paper clip on the bottom of the email box
7. Go to "Downloads" folder > find your project > click on file > OK or Open
8. Send me your email
