

FIDGET SPINNER RULES

Fidget spinners give your fingers something to do quietly while still allowing you to focus on your primary task. If a fidget spinner is *distracting you* from your primary task, **you am NOT using it properly**. Fidget spinners should be used quietly under your desk so they don't bother others. Here are a few rules to remember:

- Only use spinners appropriately in classrooms where the teacher says it is ok
- Do not let it become a distraction to you or anyone else.
- Immediately put it away if the teacher asks you to.
- Teachers may take away your spinner or give you **detentions** if the spinner *becomes a classroom distraction*.
