

Get Started Hotspot Information

Connecting From Home

To connect a Chromebook at home you will need a home wireless network or a WiFi hotspot

As a graduate of the Digital Citizenship Academy your school site will provide you with:

- ❖ Chromebook
- ❖ Mouse
- ❖ Sprint Netgear WiFi Hotspot

Note: Your school can help connect your Chromebook to your hotspot.

What is a Wireless Network and/or WiFi

A wireless network uses radio waves to connect laptops, cell phones and other devices to the Internet.

When you connect any device to a WiFi hotspot at a cafe, library, or other public place you are connecting to that business's wireless network

SAUSD Chromebooks connect to the Internet using wireless network connections.

What is a Hotspot?

A hotspot allows you to connect wirelessly to Chromebooks and iPads. The hotspot has a network name and password that will need to be entered in the device in order for the hotspot to provide Internet access.

Get Started with NETGEAR Hotspot

What's in the Box

- Hotspot Device

- Get Started Guide

- USB Cable

- Charging Adapter

*For your convenience the battery has already been installed.

Before You Start

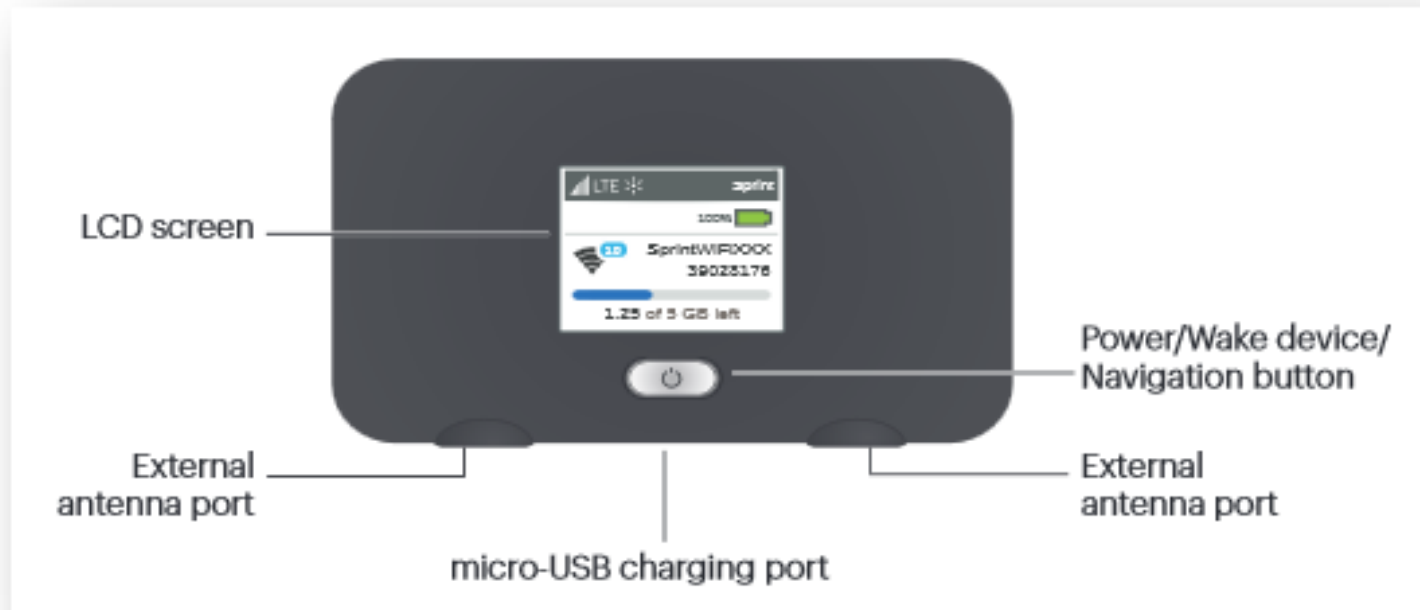

Charge the Hotspot Battery

1. Insert the USB cable into the charging adapter.
2. Insert the small end of the USB cable into the hotspot charging port at the bottom of the hotspot.
3. Plug the charging adapter into a standard AC power outlet.

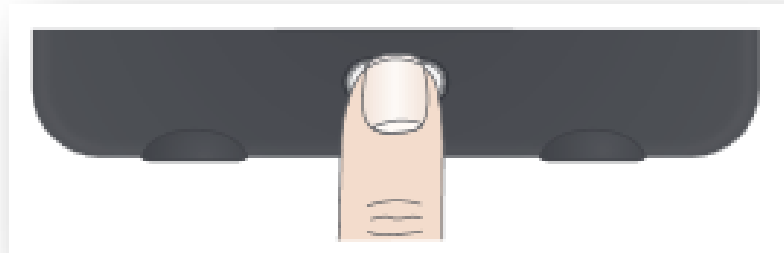

Your Hotspot Device

Get Connected

Power Up the Device

If the device is not powered on, press and hold the Power button on the front of the device for at least two seconds. The device will automatically activate.

Note: It can take several minutes for your device to connect with the Sprint network.

Main LCD Screens

You can view basic settings and alerts on the LCD screen. Press the Navigation button to scroll through the following screens:

	<p>Main Network WIFI: AC779Sa-3321EC PWD: 95903915</p> <p>Guest Network WIFI: AC779Sb-3321EC PWD: 47451274</p>	<p>Press + hold  = </p> <p>Wi-Fi Protected Setup Use WPS to connect supported devices by pushing a button instead of entering the Wi-Fi password.</p>	<p>DEVICE INFO MEID:35673306000262 My #:(555) 555-5555 ICCID:89011200000362983016 FW:NTG9X15A_01.03.04.00 Activated:1/12/2015 12:20 PM</p> <hr/> <p>Admin: http://myhotspot Password: password</p>

Connect the Chromebook to the hotspot

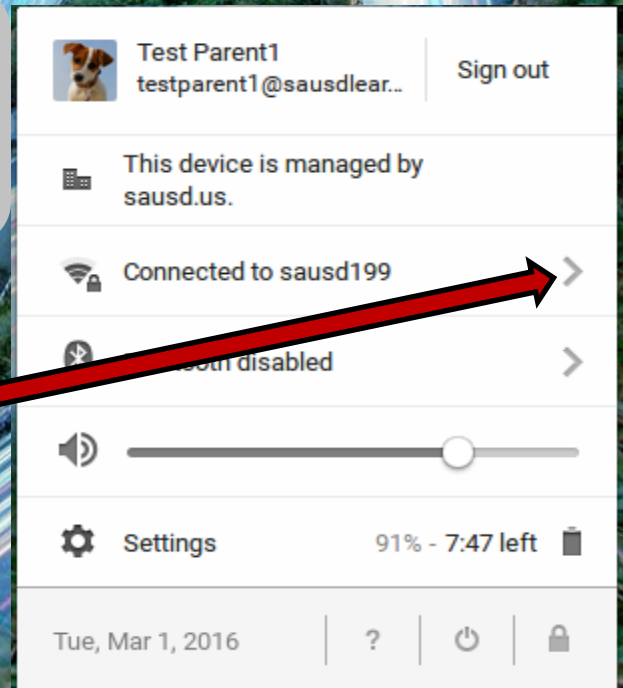

Video: [Connecting Your Chromebook to WiFi](#)

1. Turn on your Mobile Hotspot and your WiFi-enabled Chromebook.

2. Open the Wi-Fi application on your Chromebook to connect to your WiFi network
(Lower right corner)

3. Click the forward arrow to find the wireless network you wish to connect to the Chromebook.

Connect the Chromebook to the hotspot

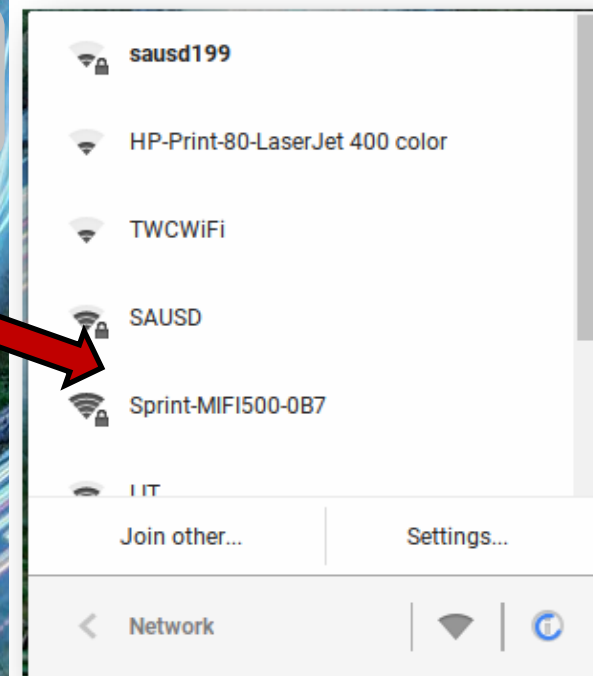

4. Find the hotspot WiFi name and Password on the WiFi Name and Password LCD screen.

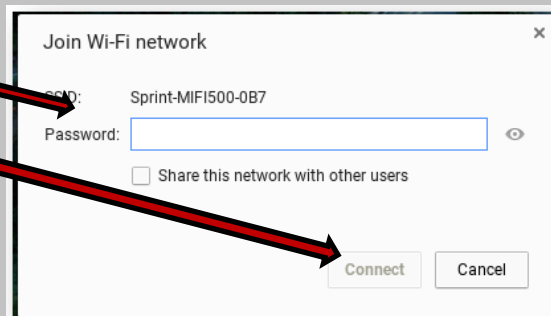

Wi-Fi Name and Password

Main Network
WiFi: AC779Sa-3321EC
PWD: 95903915
Guest Network
WiFi: AC779Sb-3321EC
PWD: 47451274

5. Select your home wireless WiFi or the SAUSD Hotspot by name.

6. Enter the WiFi password from your SAUSD hotspot.

7. Select Connect
