THE SUN RISES ON HELIO TECH

As the world continues to evolve, technology continues to improve and have many advances. There is a limited supply of fossil fuels, and the best way to continue to evolve with the world is with solar technology! Our mission is to develop innovative, convenient, and eco-friendly products. Our products allow customers to charge their devices while on the go. Helio Tech is an eco friendly technology company that focuses on using the renewable energy from the sun to power its charging devices. Helio Tech specializes in solar-power personal charging devices for active lifestyles.

Taking the Lead...

My name is Brian Renoj and I am the CEO of HelioTech I am also in many different programs around our school, from Peer Assistance Leadership (PAL) to the Gay-Straight Alliance (GSA). I aspire to go to Cal State Monterrey Bay because I really love the school and it's really close San Francisco which is where I want to live sometime in my future. I want to major in Psychology and Business Administration. I also enjoy to advocating for human rights as that's mainly what I like to do with my free time.

My name is Marcos Castellanos, I am a junior at Century High School I was born in Guatemala, but have been raised in the city of Santa Ana. Outside of school, I am involved in a soccer team to keep myself busy. When I am in school I am dedicated to put my best effort in all of my work so I won't fall behind. Working in businesses is something I'm interested in, with my father finalizing his business, it encourages me study business. There are many career choices, and, although business is my priority, I am also thinking about going into forensic science. With everything going on with school, I am determined to push myself and strive for success!

Employee of The Month

Hi my name is Luz Mora and I am the Vice President of Marketing. I am part of this years dance team and really enjoy sports. I enjoy talking with friends, going to places, and generally having a good time. I am loud, energetic, polite, and kind. I know when to have fun and when to get serious. I really enjoy being VP of marketing and getting along with my associates.

Team Bonding

Company employees spent a day bonding at a team building workshop in the local mountains in hopes that this experience would translate to greater productivity in the office.

As a team bonding exercise, we went to Alpine Conference Center in Lake Arrowhead. Employees learned to bond with one another to get comfortable with each other and trust unknown people. Each one of us faced personal fears in order to confront them. Our employees were willing to work together and enjoy a day outdoors to get an idea of new skills. Some employees found some activities challenging but found a way to overcome them. One of the challenges were to carry a person to a destination, so the person who was being carried had to trust them, they worked together to take the person to it's destination. This also helped them communicate with each other to come up with a plan, so they can agree on it and share ideas.

"Testimonies"

"I think my experience at alpine was very challenging to prove to myself that I could do things I never would've imagined. As a shy person, I learned to come out of my comfort zone while climbing a 100 foot tree. Also, I really enjoyed the team bonding experience I got to have with my classmates. We learned how good communication is crucial in a working environment. I'm thankful I got to experience this once in a lifetime adventure!"
