

POWERCLOUD

We Bring The Power To You

Company Branding

About Us

PowerCloud is a company that has created an electronic device capable of wirelessly charging multiple devices at once within a 30 ft. radius. We strive to revolutionize the way our customers live their daily lives in aspect of technology. Pairing your device to our product will instantly start charging your device until it reaches 100% without having to deal with unreliable cable chargers that fall apart. In order to charge the device you wish, you simply step in within the charge radius, connect your device through our PowerCloud app and your device is automatically being wirelessly charged.

Company Letterhead and Company Description

Here at PowerCloud we understand the importance of meeting the needs of our customers. PowerCloud has manufactured a device that can solve the problems that people face on a daily basis and ease the life of the consumers. With a 10 ft. radius and a charging capacity of up to 8 devices simultaneously, charging has never been easier. We also we programmed our transmitters and receivers to stop charging devices the second they reach 100% battery to prevent overcharging. With new products being developed, we expect to see major improvements to our selection of devices as well as a bigger variety of products to offer.
