

Pharmacy to Home Delivery Conversion Information

Effective March 01, 2017 all Express Scripts members will have to choose either home delivery or pharmacy pick-up for regular maintenance prescriptions filled on a regular basis.

If you choose...

Pharmacy Pick-Up

(HIGHER CO-PAY / PENALTY)

If you prefer to pick-up your regular maintenance prescriptions at a local pharmacy or participating retailer, you may face a higher co-payment (**a penalty**) for not taking advantage of the mail order option.

Home Delivery

(COST-EFFECTIVE)

To maximize savings, ask your doctor to write your prescription for a three-month supply, with refills as appropriate, instead of a one-month supply with refills.

It is important to ask for the three-month supply to benefit from the home delivery co-payment since you will be charged the home delivery co-pay regardless of the number of day's supply on the prescription.

If you have a prescription from your doctor...

You can request home delivery by logging into your Express Scripts account and downloading the **Self Request Delivery Form**.

Your doctor can request home delivery for you by completing and faxing the **Doctor Request Home Delivery Form**.

(You must log into your online Express Scripts account to get these forms)
