

# Connecting a Chromebook to a Verizon Hotspot

**PURPOSE** - This document will provide steps to connect a Chromebook to the JPS-issued wireless hotspot. A working Internet connection is required to log into a Chromebook.

1. Turn on the Wireless Hotspot unit by pressing and holding the on button for three seconds. You will see the Ellipsis screen booting.

Location of power button and Ellipsis boot screen

2. Once the Jetpack finishes booting, you will see the following screen.

3. Turn on the JPS Chromebook. When the login screen appears, do not attempt to log in yet.

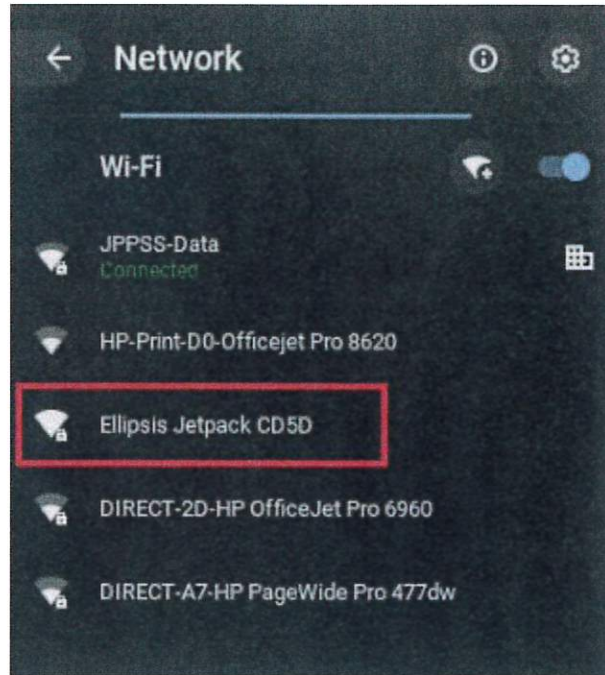

# Connecting a Chromebook to a Verizon Hotspot

4. At the bottom right of the screen, click on the time.

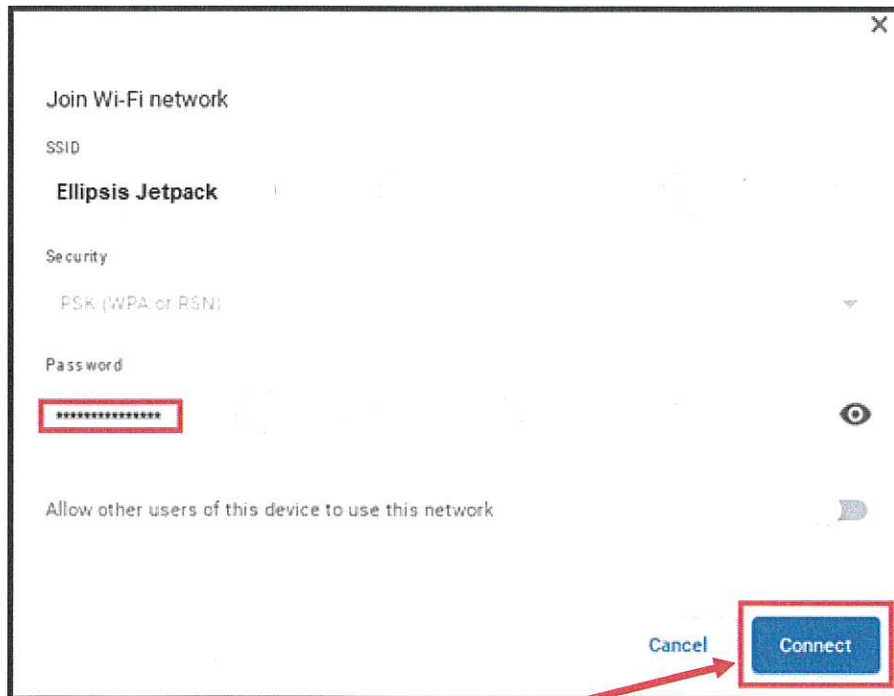

5. Select **“Not connected”**. The Chromebook Internet will turn on automatically if it is turned off.
6. The Chromebook will show a list of available internet networks. Select the Ellipsis Jetpack CD50 from the list (example list below).

8. Click on the **"Connect"** button.

Once the Chromebook has successfully connected to the Internet (Wi-Fi), you can log into your Chromebook with your JPS username and password.

9. Turning off the hotspot – When you are finished with the hotspot, you can turn it off by holding the front button for 3-4 seconds until you see the word GOODBYE in the screen. It may take a few seconds to power down.
