

How to make a Student Interest Bound Book Foldable®*

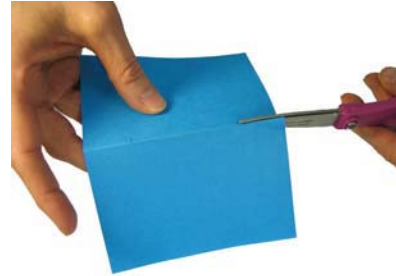

1. Fold two pieces of $\frac{1}{4}$ sheet paper ($4\frac{1}{4}'' \times 5\frac{1}{2}''$) separately in half horizontally (like a hamburger).

2. Place the folds side-by-side allowing $\frac{1}{16}''$ between the mountain tops.
Mark both folds $1''$ from the outer edges.

3. On one of the folded sheets, cut-up from the top and bottom edge to the marked spot on both sides.

4. On the second folded sheet, start at one of the marked spots and cut out the fold between the two marks. Do not cut into the fold too deeply, only shave it off.

5. Take the “cut-up” sheet and burrito it.

6. Place the burrito through the “cut out” sheet and then open the burrito up.

7. Fold the bound pages in half to form a book.
